

mini range trunking introduction

marco
minirange

Marco uPVC Mini Trunking allows for both Power and Data cables to be installed within commercial and domestic buildings, making the products ideal for new build and refurbishments.

As with its sister products, the Marco Mini Trunking has been designed with a clean, white modern aesthetic that incorporates a High Impact resistant uPVC compound, giving the product a durable yet versatile finish.

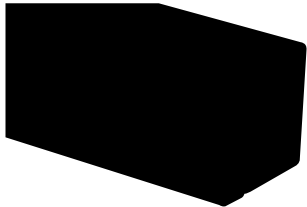

Marco's Mini Trunking comes in four sizes, both standard and self-adhesive, allowing for a quick and simple installation, The Mini Trunking has been designed for electrical contractors and data installers allowing the lid to be removed and snapped on with ease, making the product ideal for "Moves, Adds and Changes" (MAC). The Trunking is available with a full range of fittings and accessories.

key features

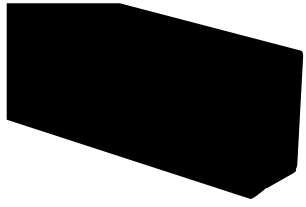

- Available in four sizes, standard and self-adhesive
- Full range of moulded fittings and accessories available
- Manufactured from High Impact Resistant uPVC compound
- Snap on lid for ease of installation
- Various depths of Mini Trunking boxes are available, with both round and square corners and mini and conduit knock-outs in each box
