

Trident UK Style Telephone Line Jacks

Key Features

- All variants are shuttered
- Designed to fit standard Euro sized backbox's
- BT recommended PABX version

Category: Voice Cabling

Part No: See Below

General Description:

All Dunasfern Inc. Auriga line jacks are shuttered. Due to broadband interference issues with the PSTN surge arrester, British Telecom recommend the use of PABX voice modules, line jacks and line adapters for the UK. To accommodate that our PABX line jacks have the 'out of service' resistor.
